

The logo for Ames Area MPO features the words "Ames Area" in a blue, sans-serif font. To the right of "Ames Area" is a large, stylized, yellow graphic that resembles the letters "MPO" with a thick, brush-stroke-like texture. Below the "Ames Area" text is a dark blue horizontal bar containing the words "metropolitan planning organization" in a white, lowercase, sans-serif font.

**Ames Area**

metropolitan planning organization

A faint, light gray map of the Ames Area is visible in the background. It shows a grid of streets, major roads, and some geographical features like rivers and parks. The map is centered on the city of Ames, Iowa.

## ***Federal Highway Administration Section***

### **Project Selection**

The Ames Area Metropolitan Planning Organization (AAMPO) Transportation Policy Committee (TPC) adopted a project rating criteria system as a means of ranking submitted projects. Highway capacity improvement projects were selected using Level of Service criteria; rehabilitation and reconstruction projects were selected based upon pavement condition index and field review. The highest ranking projects are then presented to the Transportation Technical Committee (TTC) for review and recommendation. A recommendation is then passed on to the TPC for action.

Enhancement projects consist of open space trails that have been developed during the public involvement process for the Long Range Transportation Plan (LRTP) update; new trail segments are identified and ranked by the users and the Parks and Recreation Commission. Trail segments shown in the plan are sized proportionately based upon estimated construction costs.

All highway and enhancement projects are also available for public review and comment through the City of Ames Capital Improvement Plan (CIP) process. This involves public presentations and a formal public hearing before the Ames City Council.

The Transit Board selects operating projects for CyRide as identified in the approved Passenger Transportation Plan (PTP), which serves as a needs assessment for all regional human and health service agencies. The Transit Board also approves matching funds for capital projects based upon identified route expansions.

All projects are consistent with the approved 2035 Long Range Transportation Plan adopted on Oct. 12, 2010.

AAMPO FY 2012 – 15 Transportation Improvement Program

## **Fiscal Constraint**

The AAMPO FY 2012 programming targets are \$1,321,450 for the highway element and \$91,053 for the enhancement element. The project costs shown in the TIP are in year of expenditure dollars. This is accomplished by developing an estimate of costs in the current bidding environment and then applying an inflation factor of 4% per year. The Ames City Council has programmed these projects in the City of Ames 2011-2016 CIP for the local funding allocation. These funds are generated from the City's annual Road Use Tax Fund (RUTF) distribution, Local Option Sales Tax, and General Obligation (GO) Bonds. The transit program does not have targets, and thus the requests involve significant costs in the anticipation of maximizing the amounts received.

AAMPO FY 2012 – 15 Transportation Improvement Program

**Financial Constraint Summary Tables**

## **Network Operations and Maintenance**

The capital investment and other measures necessary to preserve the existing transportation system, as well as operations, maintenance, modernization, and rehabilitation of existing and future transportation facilities are annually reviewed and programmed. Preservation, operating, and maintenance costs are included as a priority for funding. Maintenance and rehabilitation projects are also included in the AAMPO LRTP. In addition to STP funding, the City of Ames utilizes RUTF, Local Option Sales Tax, and General Obligation funding for system preservation projects. A program is also included in the City of Ames 2011-2016 CIP to address shared use path maintenance. The LRTP and Land Use Policy Plan (LUPP) both use an intersection efficiency standard of Level of Service (LOS) C.

## **Public Participation Process**

A notice advising the public about the draft TIP and Transportation Planning Work Program (TPWP) reviewed by the AAMPO Technical Committee will be mailed to 43 neighborhood organization chairpersons, representatives, of the Ames Main Street District, Campustown Action Association, NAACP, Friends of Central Iowa Biking, International Student Council at Iowa State University (ISU), League of Women Voters, and others in accordance with our approved Public Participation Plan (PPP). In addition, as previously noted, projects are available for public review and comment through the City of Ames CIP process. A public input session was held on April 26<sup>th</sup>, 2011 to discuss the TIP and receive comments. No revisions were requested by the public.

## **Title VI Compliance**

The Ames Area MPO adheres to the City of Ames's Title VI of the Civil Rights Act of 1964 Compliance Plan. The AAMPO carries out its transportation planning processes without regard to race, color, or national origin. The Compliance Plan provides information on the Ames Area MPO Title VI compliance policies, complaint procedures, and a form to initiate the complaint process for use by members of the public. For more

information or to file a complaint or concern, please contact the AAMPO Administrator at the City of Ames Public Works Administration Office at 515-239-5160.

## **Self Certification**

The AAMPO Policy Committee certified that transportation planning activities in the Ames metropolitan area are being carried out in accordance with governing Federal regulations, policies and procedures. This certification was at the meeting on March 22, 2011 (a copy of the document is attached in Appendix C).

## **Revising the TIP**

Revisions are defined as changes to a TIP that occur between scheduled periodic updates. There are two types of changes that occur under the umbrella of “revision”. The first is a major revision or “Amendment”. The second is a minor revision or “Administrative Modification”.

### **Amendment**

An amendment is a revision to the TIP that involves a major change to a project included in the TIP. This includes an addition or deletion of a project, a major change in project cost, project or project phase start dates, or a major change in design concept or project scope. Any changes to projects included only for illustrative purposes do not require an amendment. An amendment is a revision that requires public review and comment, re-demonstration of fiscal constraint, or a conformity determination (for MPO TIP’s involving non-exempt projects in non-attainment and maintenance areas). Changes that affect fiscal constraint must take place by amendment to the TIP.

### **Administrative Modification**

A minor revision to the TIP is an administrative modification. It includes minor changes or project phase costs, minor changes to funding sources of previously included projects, or minor changes to a project or project phase start dates. An administrative modification is a revision that does not require public review and comment, redemonstration of fiscal constraint, or a conformity determination (in nonattainment and maintenance areas).

## **Amendment vs. Administrative Modification**

There are four main components that can be used to determine whether a project change constitutes an amendment or an administrative modification. They include the following:

**Project Costs** – Determination will be made based on the percentage of change or dollar amount of change in federal aid. Projects in which the federal aid has been changed by more than 30% or total federal aid increases by \$2.0 million or more will require an amendment. Anything less can be processed with an administrative modification.

**Schedule Change** – Changes in schedules to projects which are included in the first four years of the TIP will be considered administrative modifications. Projects which are added to or deleted from the TIP will be processed as amendments.

**Funding Sources** – Additional federal funding sources to a project will require an amendment. Changes to funding from one source to another will require an administrative modification.

**Scope Change** – Changing project termini or changing the amount of through traffic lanes will be processed as an amendment. Other examples of changes that require an amendment include changing the type of work from an overlay to reconstruction or changing the project to include widening of the roadway.

## **Procedural Requirements for Revisions**

Amendments are considered major revisions and therefore have more procedural requirements. The main requirement is an opportunity for public input. The second is technical and policy board approval of the amendment. Public involvement for amendments will occur at the local level for all AAMPO amendments.

Statewide public review for Iowa DOT project amendments takes place at the time of inclusion in the Iowa DOT's Statewide TIP (STIP). Iowa DOT sponsored projects within the AAMPO planning boundary must go through the AAMPO's adopted amendment

process, which includes public review and approval by the Technical and Policy Committees.

Administrative modifications have simplified procedures which allow more flexibility in the processing of changes. The AAMPO processes changes that qualify as administrative modifications by seeking Policy Committee approval or the administrator may make minor changes if the process is documented and meets the administrative modification requirements.

Finally, each type of revision needs to be processed in Transportation Program Management System (TPMS) and the date of approval by the AAMPO needs to be included in the revision submittal.

### **Revision Procedures**

The AAMPO documents their procedures for processing amendments and administrative modifications by way of Policy Committee action and their respective meeting minutes. They are included in the public participation documents and in the TIP according to procedures in the approved TPWP.

Formal amendments should be submitted to the AAMPO staff that is then able to review the amendment for impact on fiscal constraint and other factors. The amendment is then presented to the TTC for review and approval. The TTC considers a recommendation of the amendment to the TPC, whom then too will consider the amendment for approval. The amendment is finally submitted to the Iowa DOT and FHWA / FTA for final approval and for incorporation into the STIP.

The documentation includes the definitions of amendments and administrative modifications. It also includes detailed procedures on how each type of revision is processed. It should be noted the Iowa DOT does not require the AAMPO follow the same procedures for public involvement or administrative processes.

## **Federal Transit Administration Section**

### **FY 2012 TIP FTA Project Justification**

The following transit projects identified within the draft FY 2012 – 15 TIP were included within the 2012 Passenger Transportation Plan (PTP) Update, meeting the requirements to have all federal and state transit funding within an approved PTP prior to TIP approval. The following narrative describes the projects within the initial year of the plan.

**General Operations:** This funding supports the day-to-day transit operations of the Ames Transit Authority from Ames' urbanized area federal apportionment, Transit Intensive Cities, and State Transit Assistance funding.

**Brown Route Frequency/Hours Expansion:** In 2008, CyRide added additional service between campus and North Grand Mall based on demand in the Somerset area during the summer weekdays and weekday nights during the remainder of the year. Weekday nights improved to 40-minute frequencies until 9:00pm instead of ending at 7:00 pm, and Weekday Summer service doubled to 20-minutes. This would provide a fifth year of service for these expanded services.

**Midday South Duff Expansion:** In 2008, CyRide added mid-day service hours to its Yellow Route to the southeast area of Ames known as the #4A Gray Route. This route operated every 60 minutes alternating between the current Gray Route and this southeast area allowing connections directly to ISU campus instead of transferring at Ames City Hall. Before, only one mid-day trip currently operated to this area. This would provide a fifth year of service for this additional mid-day service.

**Contracted Paratransit (Dial-A-Ride) Service:** According to federal regulations, public transit agencies providing fixed-route transit service in their community must also provide door-to-door transportation service within a ¾ mile area of that fixed-route service. Therefore, CyRide purchases transportation service for its Dial-A-Ride operations in order to meet this ADA requirement. This requirement has been expanded to the entire city limits of Ames.

**Transit Amenities:** CyRide developed a Bus Stop Plan that recommended an implementation plan for bus stop amenities along CyRide's fixed-route system. From the prioritization of recommended stop improvements, concrete pads will be added for easier boarding/alighting during inclement weather as well as replacing bus shelters with lighted bus shelters to improve the accessibility for patrons and CyRide's image throughout the Ames community. In addition, bus tracking technology will be incorporated into CyRide's system allowing better travel information to be communicated to the public. Passengers would be able to obtain in real time when the next two buses would travel past a particular bus stop by plugging in the particular stop number associated with the stop into the website, texting or calling. This feature would allow information to be dispersed to those with disabilities more readily through these methods. However, the stops need to be upgraded to include the stop number on the bus stop sign and the numbers of where to call and text. Additional options include adding LED signs next to approximately 25 high ridership stops that indicate visually when the next two buses are coming.

**Light Duty Bus Replacement:** Two buses have exceeded FTA guidelines for their useful life. Bus identification numbers are 978 and 979. These units will be replaced with 176" light-duty diesel buses, equipped with cameras, and will be ADA accessible.

**Vehicle Surveillance Systems:** CyRide utilizes surveillance systems on its buses to reduce liability to the City as well as enable cooperation with the Police Department for situational issues on the bus or throughout the community. This equipment is utilized daily in monitoring issues on the buses that are either tagged as events on the buses or in the community. Originally, Safety Vision surveillance systems were purchased in 2004 now seven years old of which 15 systems remain. CyRide purchased additional systems to install on the majority of the fleet in 2007 from GE. Staff indicates a dramatic difference between the GE system and Safety Vision system initially purchased, including difficulty in relaying information to the police department. Furthermore, replacement parts for the Safety Vision are not available and staff recommends replacing these outdated systems with newer technology.

**Storage area air handling replacement, piping-ductwork relocation and upgrade**

**sprinkler system**: CyRide's facility was constructed in 1983 and is in need of rehabilitation of the storage area air handling, relocating piping-ductwork and upgrading the sprinkler system, which can be completed simultaneously reducing construction costs. These efforts are described as follows:

*Storage Air Handling*: Results from an April 2006 study by the Worksafe Iowa Department of Occupational and Environmental Health revealed that employees working in the old bus storage area receive substantial exposure to diesel particulates. Specifically, 36 percent of the aerosol generated during the morning drive-off time is still present over four hours later. Therefore, employees are instructed to avoid this area whenever possible but are still required to walk through this area to access their buses. The study recommends increasing ventilation rates by a factor of four within this portion of the facility.

*Piping/Ductwork*: CyRide received 12 hybrid buses in July 2010 which are currently unable to circulate through the entire storage barn, specifically lanes five through eight due to low ductwork and piping in this portion of the facility. The original portion of the facility's ceiling was designed in the 1980's to be low in height in order to conserve energy. The hybrid buses will only be able to enter through door 13 and exit through lanes one through four. Accidents have already occurred in where a driver forgot they were driving a hybrid and exited through door 5 regardless of visual precautions. In addition, the hybrids are now parking in the newest portion of the garage since this area can accommodate their height, diverting 20-37-year old buses that exude the highest emissions to the old storage area. Those older vehicles were parking in the newest area due to the greater ventilation in this newer area.

*Sprinkler System Upgrade*: CyRide parks 75 vehicles within its storage area in an extremely close manner in an effort to maximize the space. Severe damage could result if a fire broke out as the lightly designed sprinklers are not equipped to put out the fire. In addition, it is unlikely that the City of Ames Fire Department could be safely deployed into the facility without risk of getting equipment stuck

between the vehicles. CyRide's insurance carrier, FM Global, recommends that the sprinkler system be upgraded to provide better deterrence from fire spreading into, under, and through adjacent buses parked within the facility.

**Boilers:** CyRide's boilers which heat a substantial portion of the transit facility are original to when the facility was built in 1983. They are currently 28 years old and are in poor condition. CyRide estimates the useful life of a boiler to be 25 years therefore; these boilers are past their useful life and need replaced before failure occurs.

**Ames Intermodal Facility Expansion Phase II:** In 2009, CyRide, the City of Ames, and ISU worked collaboratively on developing an Intermodal Transportation Facility project based upon a need to connect transportation modes within the Ames community. The Intermodal Facility would accommodate and link public and private transportation modes (public transit, intercity bus carriers, regional airport shuttle services, carpools/vanpools, taxis, bicycle commuters, and pedestrians) for the residents, students, faculty, and visitors of Ames and the Central Iowa region. On February 17, 2010, CyRide received approximately \$8.465 million through the Transportation Investment Generating Economic Recovery (TIGER) program of the 2009 Recovery Act for the Intermodal project. The facility, which was quickly redesigned to accommodate a lower budget, is currently under construction to be open in July 2012. Since this funding only allowed a portion of the originally conceived project elements to be constructed, it is anticipated that future DOT funding opportunities may be available within the new transportation reauthorization to help completely fund phase II of the Intermodal Facility estimated at approximately \$12 million to complete. These additional vital remaining elements include:

- Two additional bus bays for the public transit operator CyRide
- Two additional hybrid biodiesel buses for CyRide
- Automatic Vehicle Location System
- Additional 350 parking spaces allowing enough revenues to facilitate the operation of a public transit shuttle between campus and the facility.
- Bike path through the ISU arboretum adjacent to the facility connecting west Ames with a high residential area to ISU campus.
- Additional bike lockers (12)

Overall design, construction, buses and contingency funding estimate the following budget for phase two of the Intermodal Facility:

<b>Federal Funds</b>	<b>Dollars</b>	<b>Percent</b>
<b>TOTAL Federal TIGER Request</b>	<b>\$10,000,000</b>	<b>80%</b>
<b>Non-Federal Matching Funds</b>		
Land Value (Iowa State University)	\$2,200,000	17.6%
CyRide Capital Budget	\$125,000	1.0%
City of Ames Capital Budget	\$175,000	1.4%
<b>TOTAL Non-Federal Match</b>	<b>\$2,579,000</b>	<b>20%</b>
<b>TOTAL</b>	<b>\$12,500,000</b>	<b>100%</b>

**E. 13<sup>th</sup> Street/Lincoln Way/Dayton Ave. Service Expansion:** A new route was added in August 2010 traveling via E. 13 Street/Lincoln Way/Dayton Avenue to the commercial and industrial areas of east Ames. Medical services, human service agencies and industrial businesses are common to the area and many residents are requesting same day transportation to that part of the community. The route would provide access to businesses such as 3M, Mainstream Living, Child Serve, Mary Greeley Dialysis, Wolfe Clinic, National Animal Disease Center and Sauer-Danfoss. Service to this area has been a high priority since 2007 within the annual Passenger Transportation Plan process between transportation providers and human service agencies. This would provide a second year of service to this commercial-industrial area.

**Heavy Duty Bus Replacement:** Thirteen buses have exceeded FTA guidelines for useful life. Bus numbers are 944, 945, 946, 947, 953, 954, 955, 956, 957, 958, 8917, 8918 and 141. These units will be replaced with 40' heavy-duty buses, equipped with cameras. These replacement vehicles will be ADA accessible.

***Appendix C: AAMPO Self Certification***

**AMES AREA METROPOLITAN PLANNING ORGANIZATION**  
**ANNUAL SELF-CERTIFICATION**

In accordance with 23 CFR 450.334, the STATE DEPARTMENT OF TRANSPORTATION and the Ames Area Metropolitan Planning Organization for the Ames, Iowa urbanized area(s) hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134, 49 U.S.C. Section 5303, and 23 CFR Part 450;
- (2) In nonattainment and maintenance areas, Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506(c) and (d) and 40 CFR 93);
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;
- (5) Section 1101(b) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (Pub. L. 109-59) regarding the involvement of Disadvantaged Business Enterprises in FHWA and FTA funded planning;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and USDOT implementing regulation;
- (8) Older Americans Act, as amended (42 U.S.C. 6101);
- (9) 23 U.S.C. 324, regarding prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 and 49 CFR Part 27, regarding discrimination against individuals with disabilities.

For AAMPO:

  
Ann Campbell, Chair  
Transportation Policy Committee

3/22/11  
Date

***Appendix D: Transportation Policy Committee Meeting  
Minutes***

**MINUTES OF THE MEETING OF THE  
AMES AREA METROPOLITAN PLANNING ORGANIZATION (AAMPO)  
TRANSPORTATION POLICY COMMITTEE**

**AMES, IOWA**

**JUNE 28, 2011**

**MEETING OF THE AMES AREA METROPOLITAN  
PLANNING ORGANIZATION TRANSPORTATION POLICY COMMITTEE**

The Ames Area Metropolitan Planning Organization (AAMPO) Transportation Policy Committee met at 7:00 p.m. on the 28th day of June, 2011, in the City Council Chambers in City Hall, 515 Clark Avenue, pursuant to law with the following voting members present: Campbell, Clinton, Davis, Goodman, Larson, Mahayni, Orazem, and Wacha. Also present were AAMPO Administrator John Joiner, and Rudy Koester, City of Ames Transportation Planner. Voting Member O'Brien was absent. The Transit Agency appointee has not yet been named.

**PUBLIC HEARING ON PROPOSED 2012-2015 TRANSPORTATION IMPROVEMENT**

**PLAN (TIP):** Public Works Director John Joiner explained that the proposed FY 2012-2015 TIP provides for projects for street improvements, CyRide improvements, and trail projects. According to Mr. Joiner, a public input session was held on April 26, 2011, to receive comments on the 2012-15 TIP. No revisions were requested by the public. Rudy Koester, Transportation Planner reported that the deadline for submission of the TIP is July 15, 2011.

Ms. Campbell opened the public hearing. There was no one wishing to speak, and the hearing was closed.

Moved by Davis, seconded by Mahayni, to approve the FY 2012-2015 Transportation Improvement Plan.

Vote on Motion: 8-0. Motion declared carried unanimously.

**ADJOURNMENT:** Moved by Davis, seconded by Goodman, to adjourn the meeting at 7:05 p.m.

Vote on Motion: 8-0. Motion declared carried unanimously.
